

Eco-friendly specification

Reducing usage of lubrication oil C-Lube

Eco-friendly

Consumption of precious oil resource is minimized! And elimination of oil feeder and its piping reduces the initial cost!

Contributes to reduction of total cost and environmental loads!!

C-Lube

Oil usage reduction effect

Maintenance free

Endures running over 20,000 km without oil feeding!

Troublesome Jubrication maintenance process is reduced!!

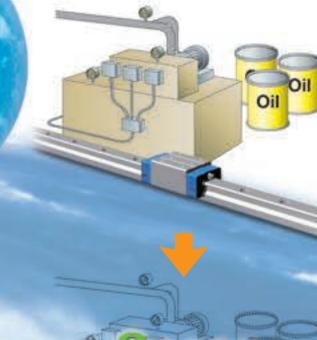

Distance equivalent to halfway around the globe

Compactness

The space consuming oil feeder is eliminated to save the space!

Freedom of machine designing is expanded for user!!

Efficient use of space

Oil

Oil

Features of C-Lube Linear Way and C-Lube Linear Roller Way

Original and world's first structure with [C-Lube]

C-Lube Linear Way The aquamarine end plate is the symbol of maintenance free.

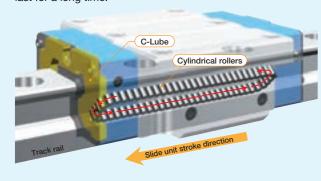

C-Lube integrated

Lubrication oil is carried through circulation of rolling elements

The lubrication oil is supplied directly to the rolling elements, not to the track rail.

When rolling elements make contact with the capillary lubricating element integrated with the circulation path of slide unit rolling elements, the lubrication oil is supplied to surfaces of rolling elements and carried to the loading area through circulation of rolling elements.

This results in adequate lubrication oil being properly maintained in the loading area and lubrication performance will last for a long time.

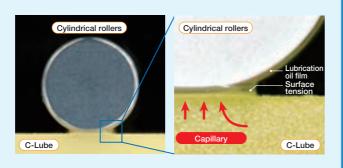

Lubrication oil is directly supplied to surfaces of the rolling elements

The surface of capillary lubricating element is always covered with the lubrication oil.

Lubrication oil is continuously supplied to the surface of rolling elements by surface tension in the contact of capillary lubricating element surface and rolling elements.

On the surface of capillary lubricating element with which the rolling elements make contact, new lubrication oil is always supplied from the other sections.

Long term maintenance free is realized with oil

impregnated with C-Lube only !!

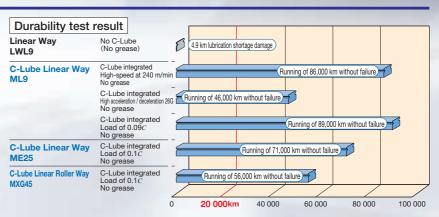

Maintenance free

This endures running over 20,000 km without oil feeding with lubrication oil in the C-Lube only.

Furthermore, grease is pre-packed in the slide unit so long term maintenance free can be realized.

*1. Typical device life is assumed. Re-greasing may be necessary depending on use conditions.

Traveling distance km

Eco-friendly

As lubrication oil in C-Lube is supplied by the amount necessary to maintain lubrication performance of the rolling guide, the consumption of lubrication oil is reduced and lubrication performance is maintained even when it run for a long period.

Eco-friendly specification reducing

usage of lubrication oil!

Compact

As C-Lube Linear Way and C-Lube Linear Roller Way are integrated with lubrication part C-Lube, their slide units are not long unlike types with external lubrication parts.

Replacement of conventional parts is easy free from constraints of mounting space and stroke length.

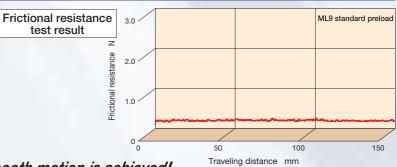

Compact design taking into account compactness!

Smooth

C-Lube Linear Way and C-Lube Linear Roller Way do not generate slide resistance unlike lubrication parts external to the slide unit that make contact with the track rail.

Driving force follow-up property is superior and energy is saved by improvement of accuracy and reduction of friction loss.

Light and smooth motion is achieved!

I - 13

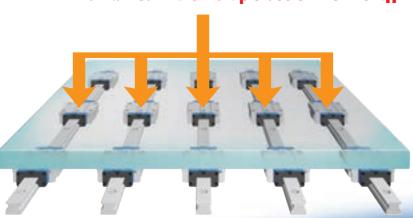

Ultimate Interchangeable pursuit of elimination

system by radical of any waste

Accuracy interchangeability

Three accuracy classes are available! Height variation can be controlled with multiple assembled sets!

High accuracy of the device can be maintained in the multiple-use environment!!

Unit interchangeability

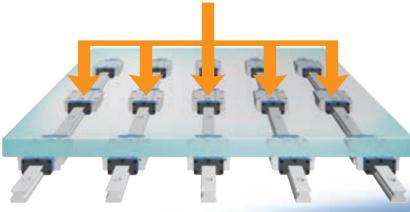

Many type of slide units are available! Every slide unit is interchangeable with the same track rail!

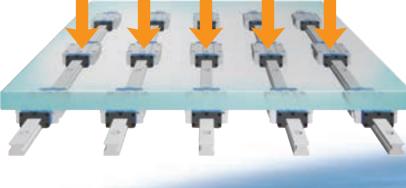

It is easily added or replaced!!

Short delivery products

Separate delivery of slide unit and track rail!

You may order what you need by any quantity at any time!!

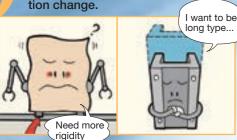

Unit interchangeability

If you use Linear Way of Interchangeable specification, you may need to replace only slide unit.

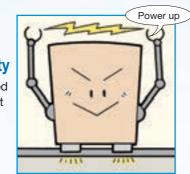

I need to increase the rigidity of the unit because of sudden specification change.

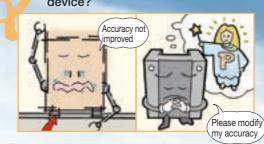

Unit interchangeability

The rigidity can be improved easily by increasing the unit

I carelessly forgot to arrange some parts, but I need them urgently.

Accuracy interchange ability, preload interchangeability

How do you like to use accuracy higher by one class or higher preload type?

As accuracy of the interchangeable products is controlled strictly by parts, setting can be modified.

Short delivery available Interchangeable parts are

available for short delivery, they can be delivered quickly with our perfect inventory system. Slide unit and track rail can be ordered individually

Free combination is enabled for model, accuracy, preload!!

Ultimate interchangeable system

Interchangeable specification

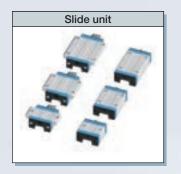

Requirements of;

- Wish to improve the rigidity and life of machines
- Wish to improve the accuracy of machines
- Wish to replace the slide unit immediately
- The number of slide units is in short
- Wish to replace the track rail immediately
- The length of track rail is not sufficient
- Wish to store only the slide units in stock for emergency

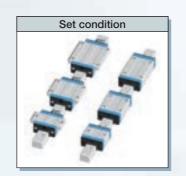

Interchangeable specification realizes;

- Wish to prepare for a sudden design change
- Wish to select freely the combination of high accuracy and preload
- Slide unit and track rail are separately handled
- Free combination of slide unit and track rail can be selected
- Compactness-independent storing of slide units and track rails

Select the products as many as you wish.

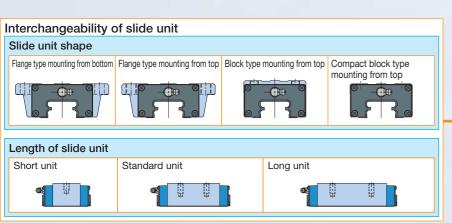

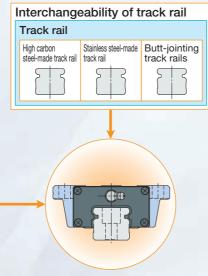

Unit interchangeability

A wide variety of slide unit models with different sectional shape and length are provided, for free replacement on the same track rail.

Free selection is possible for slide units and track rails!

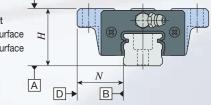

Interchangeable specification has realized the incomparable high interchangeability by severely managing the dimensions of slide unit and track rail with the background of unique high processing technology. This feature allows independent handling of slide unit and track rail, thus allowing you to select free combination and to order any products for any volume at any necessary time.

Accuracy interchangeability

Three accuracy classes of Ordinary, High and Precision class are provided, to support even high traveling accuracy purposes. In addition, as height variation of multiple assembled sets is managed with high accuracy, you may use parallel track rails at ease.

Standard setting up to precision

- Tolerances of dimensions H and N
- Variation of dimensions H and N in 1 set
- Parallelism in operation of the C surface to A surface
- Parallelism in operation of the D surface to A surface
 Parallelism in operation of the D surface to B surface

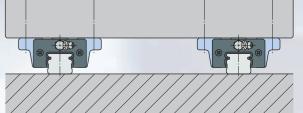

It allows the accuracy improvement of units without design changes!

Corresponding to parallel arrangement of multiple assembled sets as standard

 Variation of dimensions H of multiple assembled sets is specified

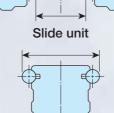

Preload interchangeability

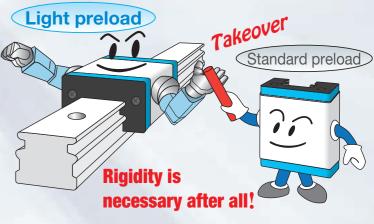

The high accuracy dimensions management utilizing the simple structure achieved the interchangeability of preloaded slide units. It supports the applications requiring the rigidity of one higher rank.

to high accuracy dimensions control

High preload setting is possible thanks

Track rail

It allows the rigidity improvement of units without design changes!

Maintenance free is achieved only by replacing the slide unit!

By replacing the interchangeable Linear Way or Linear Roller Way slide unit with C-Lube Linear Way or C-Lube Linear Roller Way slide unit, maintenance free is achieved while using the same track rail.

IK 's excellent features realized by contact in two-row raceways

a simple structure by four-points

Two-row four-point contact type simple structure

IKO adopts two-row four-point contact type for every Linear Way series. Thanks to our design know how and production technologies having been fostered for long time, high accuracy and smooth motion are realized in the micro series.

In addition, load in every direction can be received evenly and therefore stable high accuracy and rigidity can be achieved even in applications where load has variable direction and size or complex load is applied.

Essential for micro sizing!

Micro Linear Way L realized by simple structure

IKO Micro Linear Way L

Micro Linear Way L for further needs of miniaturization produced by original small sizing technology.

Wide variety of track rail width from 1 mm to 6 mm is available and high accuracy of micro positioning mechanism is realized.

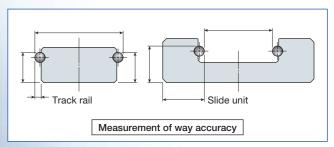

- High accuracy even with the smallest size of 1 mm*!
- Even the smallest size of 1 mm can be securely mounted and fixed**!
- Even the smallest size of 1 mm can ensure stable operation!

LWL1 can be used for further super miniaturization of machines and devices with free-minded thinking.

Interchangeable

The simple structure of four-contact in two-row raceway yields small manufacturing errors or accuracy measurement errors, allowing the maintenance of each raceway in the high dimensions accuracy.

This technology realizes interchangeable specification and high interchangeable system in every series!

As the ball is stabilized during track groove measurement, measurement of high accuracy and precise preload management are possible.

Variety of models and size variations

A wide variety of models and sizes, such as super miniature size of only 1 mm track rail width, is provided for your selection to meet each requirement.

Series		Model	Size	Track ra Min	il width Max
C-Lube Linear Way ML	ML	20 models	15 sizes	3 ~	42 mm
Linear Way L	LWL	22 models	19 sizes	1 ~	42 mm

C-Lube Linear Way MH	MH	17 models	9 sizes	8 ~	45 mm
Linear Way H	LWH	19 models	11 sizes	8 ~	65 mm
Linear Way F	LWF	4 models	7 sizes	33 ~	90 mm
C-Lube Linear Way MUL	MUL	1 model	2 sizes	25 ~	30 mm
Linear Way U	LWU	1 model	4 sizes	40 ~	86 mm

Ultimate high performance produced by world's

first roller guide structure of **I**

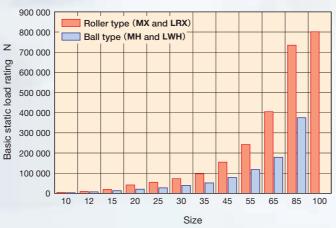

Super high load capacity

The Linear Roller Way Super X has a large contact area with the way and a number of cylindrical rollers with excellent load capacity, which allows to achieve larger load rating.

Comparison of basic dynamic load rating

Comparison of basic static load rating

Size smaller by one size than the ball type can be used!

Long life

《Ball Type》 MHG45

C = 124 000 N $C_0 = 223 000 \text{ N}$

 $L = 220\,000\,\mathrm{km}$

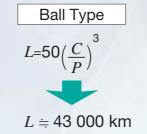

C = 95 200 N $C_0 = 114 000 \text{ N}$

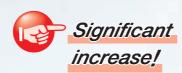

- C: Basic dynamic load rating N C_0 : Basic static load rating N
- L: Life km
- P: Applied load N

Roller type has large basic dynamic load rating C and long life due to the different "index"!

[Life calculation example]

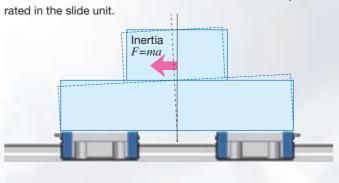

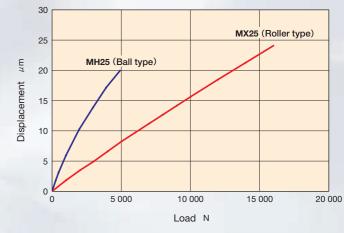

Super high rigidity

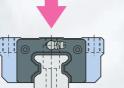

The rigidity of linear motion rolling guide significantly affects properties of machines and devices to be incorporated.

The Linear Roller Way Super X achieves high rigidity as a number of small cylindrical rollers with smaller elastic deformation relative to load than that of balls are incorporated in the slide unit

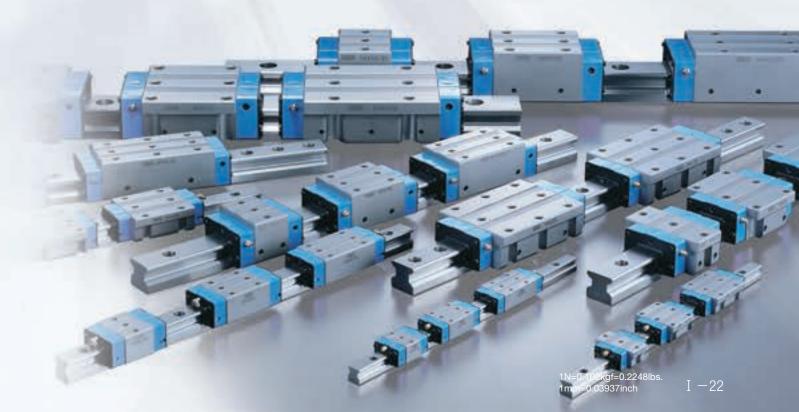

Comparison of elastic deformation

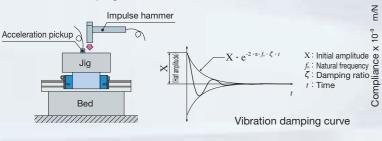

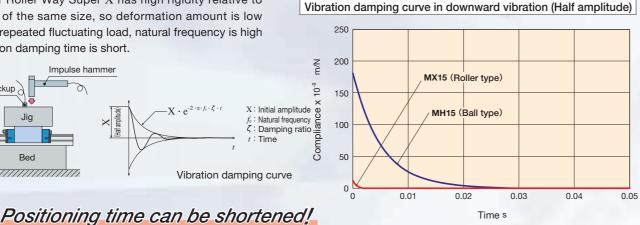

Well-balanced high rigidity is realized in every direction!

Vibration characteristics

The Linear Roller Way Super X has high rigidity relative to ball types of the same size, so deformation amount is low relative to repeated fluctuating load, natural frequency is high and vibration damping time is short.

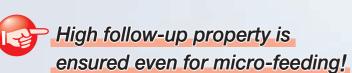

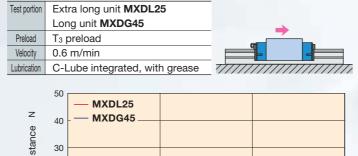

Allows accurate positioning with excellent frictional characteristic

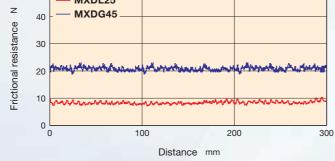

The Linear Roller Way Super X prevents skew of cylindrical roller and achieves smooth motion by adopting unique retaining method to accurately guide cylindrical roller ends with retaining plate.

The Linear Roller Way Super X has good response characteristics to micro-feeding and allows for accurate positioning, thanks to small frictional resistance against preload and load and excellent frictional characteristics relative to plain guides and ball type linear motion rolling guide.

MXDL25 and MXDG45 T₃ preload frictional resistance

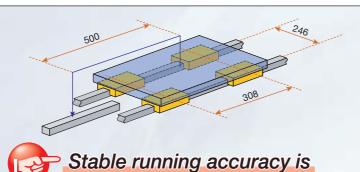

High running accuracy

Optimal design based on analysis of re-circulation behavior of cylindrical roller circulation realizes smooth and quiet motion. In addition, load is applied to many cylindrical rollers and therefore the micro deflection during running is minimized. Extra long unit is optimal for applications requiring higher running accuracy. (For more information, see page I-29)

Deflection amount during running

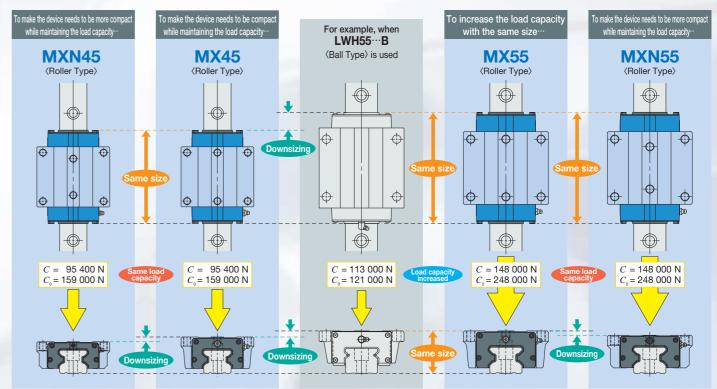

MXDG30 T₃ preload 0.12

achieved!

Corresponding to compactification

Roller type with significantly higher load capacity than the ball type. The Linear Roller Way Super X allows for downsizing from many size variations for compactification of devices.

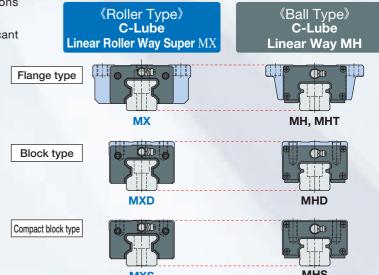

Compatible ball type and mounting dimensions

The Linear Roller Way Super X has mounting dimensions compatible with the ball type Linear Way H.

Replacement with roller type is possible without significant design change to machine or device.

Downsizing and increased load capacity are possible!

C-Lube Linear Roller Way Super MX

XMASTER GRADE

Introducing the low fluctuation specification product, for superb high-precision feed!

The C-Lube Linear Roller Way Super MX low fluctuation specification MX Master Grade has special precision processing on the roller raceway surface, significantly reducing fluctuation compared to the standard extra long unit and thus making it the ideal product for ultra-precision working machine shaft guides, which require high-precision, high-quality machining.

Applicable products

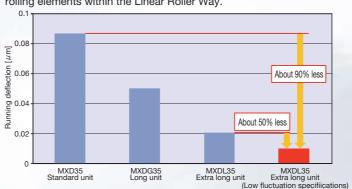

Series	C-Lube Linear Roller Way Super MX	
Supported models	MXL、MXDL、MXSL、MXNL、MXNSL	
Size	30·35·45·55	
MX Master Grade	e (low fluctuation specifications) is a special order d please contact IKO.	

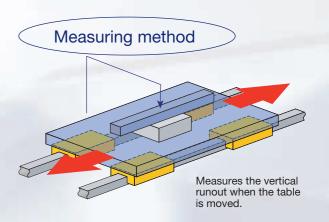

Features

Special raceway processing suppresses miniscule running deflection and significantly reduces pulsation compared to standard extra long units.

Fluctuation comparison data

Pulsation: Refers to the running deflection related to movement of the rolling elements within the Linear Roller Way.

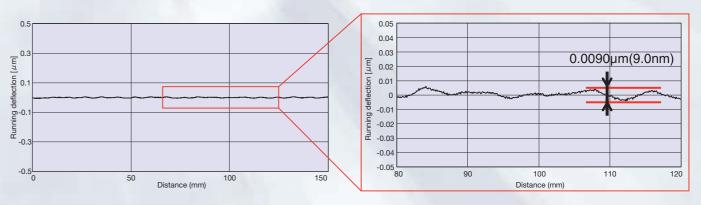

Super low fluctuation is achieved!

About 50% less fluctuation compared with the standard extra long unit!

Low fluctuation makes it ideal for ultra-precision working machine shaft guides, which require high-precision, high-quality machining.

Fluctuation data

The running deflection value is within $0.0090\mu m (9.0nm)$ in actual measurement!

Improve machining quality with the use of MX Master Grade!

The extra long unit contributes to improved load capacity and rigidity in mechanical equipment.

Elastic deformation relative to load is low in comparison with the standard and long types, device rigidity is improved, accuracy is improved, and resonance can be avoided.
