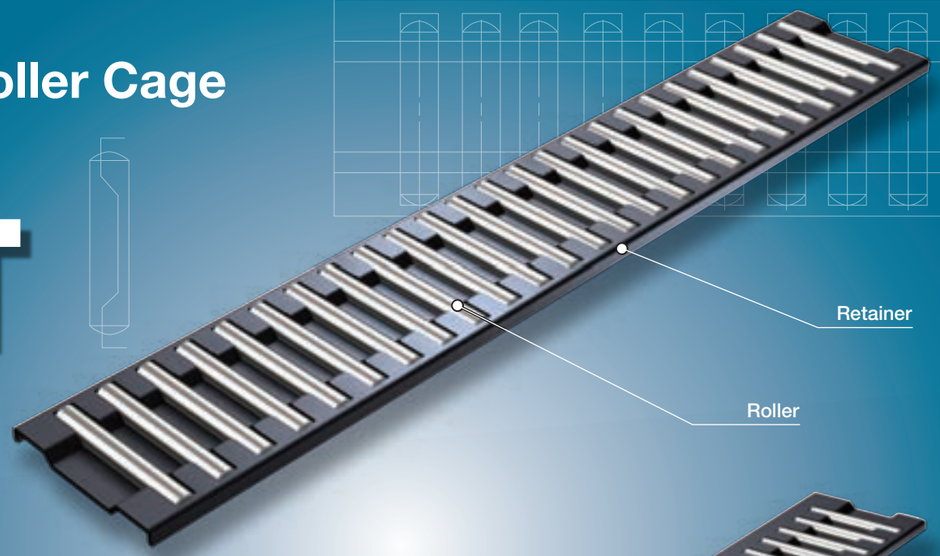
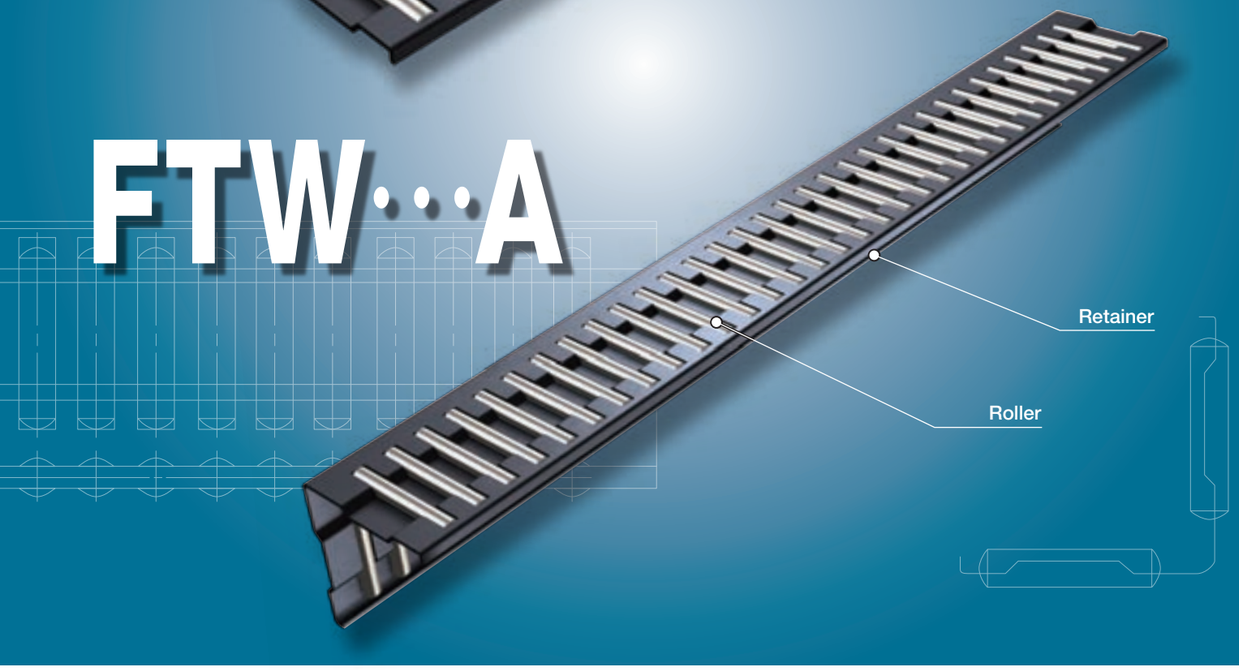
Flat Roller Cage

FT



FTW···A



Points

● Low section

1 Flat Roller Cage is a limited linear motion guide consisting of high accuracy rollers and a very precise retainers and features low cross sectional height which is as high as the roller diameter.

● Large load rating

2 Rollers are assembled in a cage with a small pitch distance, so load ratings are large and the rigidity is high.

● Simple replacement for rolling guide

3 A single row model and a double row model with a 90° are standardized and can be easily used to modify the conventional plain guide ways of machine tools, etc. into a rolling guide type without a large-scale redesign of the bed.

● Smooth operations and low noise

4 As a retainer processed with high accuracy guides the rollers, the frictional resistance is very low without stick-slip, and stable linear motion is obtained. Retainers made of synthetic resin are most suitable for applications where low noise is required.

● Easy handling

5 The rollers are caged in a retainer securely, allowing easy handling.

Identification Number and Specification

Example of an identification number

The specification of FT and FTW···A are indicated by the identification number. Indicate the identification number, consisting of a model code, dimensions, a supplemental code, and a selection code for each specification to apply.

1	2	3	2	1	5		6	4	7
FT	40	30				—	J	450	B4
FT	20	10			N				B4
FTW	40	30	V	A		—	J	450	B4

1 Model — Model code Page Ⅱ－207

2 Roller size

3 Width of retainer

Dimensions Page Ⅱ－207

4 Length of retainer

5 Retainer material — Supplemental code Page Ⅱ－207 Page Ⅱ－208

6 Jointed flat roller cage

7 Roller selection class — Selection code Page Ⅱ－208

Identification Number and Specification –Model · Roller Size · Width of Retainer · Length of Retainer · Retainer Material –

1 Model

Flat Roller Cage
Single row type : FT
Double row angle type : FTW···A

For applicable models and roller sizes, see Table 1.

2 Roller size

Indicate 10 times as large value as the roller diameter (mm).
Indicate $10\sqrt{2}$ times as large integer value as roller diameter (mm) for those with code V.

Table 1 Models and sizes of FT and FTW···A

Shape	Retainer material	Model	Roller size							
			20	25	30	35	40	50	100	200
Single row type 	Steel made	FT	○	○	○	○	○	○	○	○
	Synthetic resin made	FT···N	○	○	○	○	–	–	–	–
Double row angle type 	Steel made	FTW···A	–	–	–	–	○	○	○	○

3 Width of retainer

Indicate the width of retainer in mm.

4 Length of retainer

Indicate the length of retainer in mm.
Length other than the standard length stated in the dimension table can be prepared upon request.
Contact IKO for further information.

5 Retainer material

Steel made : No symbol
Synthetic resin made : N
Specify the retainer material.
For applicable models and roller sizes, see Table 1.

- Jointed Flat Roller Cage · Roller Selection Class -

6 Jointed flat roller cage

Standard length retainer : No symbol
Jointed flat roller cage : J
Indicate full length of the retainer as well and specify ones longer than the standard length.

Flat Roller Cage with extended full length can be produced by connecting steel made retainers each other. If needed, please specify a retainer full length in mm after the supplemental code "J" following the way indicated in the example of an identification number. Maximum length of a jointed flat roller cage is indicated in Table 2.
Length longer than the maximum stated in Table 2 can be prepared upon request. Contact IKO for further information.

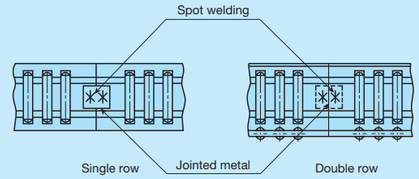

Fig. 1 Connection by spot welding

Table 2 Maximum length of jointed flat roller cage unit: mm

Identification number	Maximum length of retainer
FT 2010 FT 2515 FT 3020	300
FT 3525	375
FT 4030 FT 4035 FT 4026 V	600

7 Roller selection class

For roller selection classes and tolerances of dimensions for roller diameters, see Table 3.

Tolerances of dimensions for roller diameters are indicated in Table 3. Normally, one of the standard selection classes is delivered.
To achieve accurate load distribution, it is necessary to combine products with the same selection code. If needed, please specify it following the way indicated in the example of an identification number.

Table 3 Roller selection class unit: μm

Selection class	Selection code	Average tolerances of dimensions for roller diameters (1)
Standard	B2	0 ～ −2
	B4	−2 ～ −4
	B6	−4 ～ −6
	B8	−6 ～ −8
Semi-standard	A1	0 ～ −1
	A2	−1 ～ −2
	A3	−2 ～ −3
	A4	−3 ～ −4
	A5	−4 ～ −5
	A6	−5 ～ −6

Note (1) The dimensional accuracy of rollers conforms to JIS B 1506 "Rolling bearings-Rollers." For detailed information on accuracy, please contact IKO.

1N=0.102kgf=0.2248lbs.
1mm=0.03937inch

Precaution for Use

❶ Raceway

Recommended values for surface hardness and roughness of mating raceway are shown in Table 4 and the recommended value for the minimum effective hardening depth is shown in Table 5.

Table 4 Surface hardness and roughness of raceway

Item	Recommended value	Remark
Surface hardness	58～64HRC	When the surface hardness is low, multiply the load rating by hardness factor (1).
Surface roughness	0.2 μmRa or lower (0.8 μmRy or lower)	Where accuracy standard is low, around 0.8 μmRa (3.2 μmRy) is also allowed.

Note (1) For hardness factor, refer to Fig. 3 in page Ⅲ-5.

Table 5 Minimum effective hardening depth of raceway

unit: mm

Roller diameter		Recommended value for minimum effective hardening depth
Over	Incl.	
–	3	0.5
3	4	0.8
4	5	1.0
5	8	1.5
8	10	2.0
10	14.142	2.5
14.142	20	3.5

❷ When used for bed surface and 90° V surface

After complete lapping as indicated in Fig. 2, mount FT to FTW···VA, or FT···V to FTW···A. Combination of Flat Roller Cage at this point is indicated in Table 6.

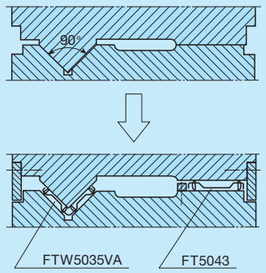

Fig. 2 Example of use on flat surface and 90° V surface

❸ Stroke length and retainer length

Movement in a linear direction as in Fig. 3 will move the Flat Roller Cage in the same direction by one half of the movement amount. Therefore, way length, stroke length and retainer length are correlated as follows:

$$L_1 = \frac{S}{2} + L \quad \cdots\cdots (1)$$

where, L_1 : Way length, mm
S : Stroke length, mm
L : Retainer length, mm

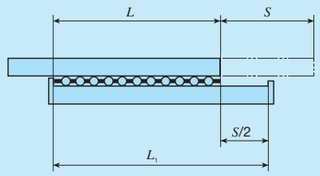

Fig. 3

❹ Operating temperature

If the retainer is made of steel, it can withstand higher temperature. However, if you use it in an environment exceeding 100℃, please contact IKO.
The retainer made of synthetic resin can withstand up to 100℃. For continuous operation, please keep it under 80℃.

Table 6 Combination of Flat Roller Cage

unit: mm

Combination Number	For flat surface		For 90° V surface	
	Identification number	Roller diameter D_w	Identification number	Roller diameter D_w
1	FT 4030	4	FTW 4030 VA	2.828
2	FT 4035	4	FTW 4030 VA	2.828

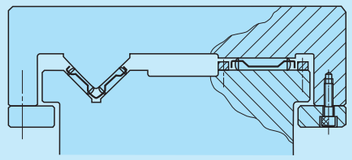
4	FT 5043	5	FTW 5035 VA	3.535
5	FT 10060 V	7.071	FTW 5045 A	5
6	FT 10060 V	7.071	FTW 5050 A	5
7	FT 10080	10	FTW 10070 VA	7.071
8	FT 200100 V	14.142	FTW 10095 A	10
9	FT 200120	20	FTW 200120 VA	14.142

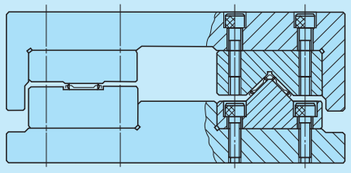
Precaution for Mounting

FT and FTW···A are typically mounted as indicated in Fig. 4. When the heat-treated and polished way is mounted to the device body, you must be careful not to make deformation by tightening.

① General case



② When a way is used



③ When overhanging load is applied

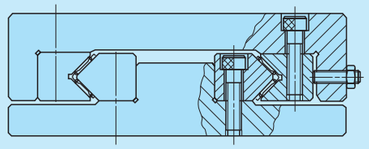


Fig. 4 Mounting examples
